Health & Safety

COVID-19 POLICY

In light of the latest COVID-19 guidelines, Villa Samuan continues to ensure that guest and employee health and safety remain our top priority. We have launched an enhanced health and safety program including intensive cleaning measures prior to guest arrival.

Upon your arrival, there will be a screening procedure including temperature checking as well as a series of questions regarding health and recent travel. Our employees will be wearing masks. We continue to closely monitor the evolving situation and abide by all local health authorities, including social distancing and group gathering recommendations.

Villa Samuan Enhanced Cleaning Procedures:

1. All staff are provided with personal protective items. This includes disposable gloves and masks.
2. Bedrooms and living areas are regularly ventilated. Outside doors are opened and ventilating fans used to increase air circulation before daily cleaning and sanitizing takes place. This is a daily protocol even if the villa does not have guests. All Bathrooms have good air circulation.
3. Hand sanitizers are available in all areas. Staff wash their hands thoroughly before and after housekeeping tasks and are reminded not to touch their face, nose and mouth.
4. All surfaces in the villas are cleaned with the appropriate cleaners. This includes sofas, rugs, drapes, and other soft/porous surfaces.
5. All linens are washed at the highest heat setting recommended by

the manufacturer.

6. Disposal of all cleaning supplies. Paper towels, disinfectant wipes, and other disposable cleaning supplies are put into rubbish and removed daily. Reusable products such as cleaning clothes are machine washed at the highest heat setting appropriate for the material.

We continue to monitor all recommendations by the appropriate authorities and will adjust our policy accordingly.
